

Wall Clock Built in DVR CCD camera

Specifications;

- Black wall clock built-in tiny wireless camera
- With a portable remote control
- Built in DVR wireless camera
- Built in memory 2 GB
- Frequency: ISM2, 400-2, and 483MHz
- Horizontal resolution: 380TVL
- CMOS total pixels:
 - PAL: 628 x 582 pixels
 - NTSC: 510 x 492 pixels
- Viewing angle: 62 degrees
- Minimum illumination: 0 lux
- Gain control: automatic
- Transmission power: 10mW
- Consumption current: 80mA
- Bandwidth: 18m
- Operating temperature: -10 degree Celsius to +40 degree Celsius
- Operating humidity: 85% RH

Features;

- A normal looking wall clock but hidden with a tiny wireless camera
- This surveillance system is well hide inside a functional clock
- With a built-in transmitter and remote control for switch to turn on and off
- The camera and transmitter are invisible to the human eye
- This system can be applied to almost any ambience
- With built-in lithium rechargeable battery
